

Sample Cutters

Sample Cutters rapidly, accurately and safely cut out circular specimens of fixed diameter. Virtually any type of material can be accommodated, including *woven, non-woven and knitted textiles, carpet, film, foam, paper and board.*

The material to be cut is placed between the *Sample Cutter* and a *Special Cutting Board*. When the safety catch is released, light downward pressure on the handwheel brings the multiple blades into contact with the material.

Specimens are cut by rotating the handwheel under a light, even pressure.

The design, and precision manufacture of the instrument ensures the specimens are perfectly circular and have smooth edges. To maintain the cutting efficiency, the blades should be turned or changed when they become damaged or blunt, and the Cutting Board should be turned or changed when it becomes worn.

For the best results, only the approved blades and boards should be used.

How to Order

STOCK CODE	MODEL	SPECIMEN AREA	SPECIMEN DIAMETER
SC1140	230-140	154 CM ² (±)	140 MM
SC1100	230-100	100 CM ²	113 MM
SC1101(c)	230-100(C)	100 CM ²	113 MM
SC1103	230-103	1/100 TH square yard	103 MM
SC1050	230-050	50 CM ²	80 MM
SC1038	230-038	12 CM ² (±)	38 MM
SC1010	230-010	10 CM ²	36 MM

Model 230/100(C) is intended for carpets and other materials up to 10mm thick. It uses heavy-duty blades. Each Sample Cutter is supplied complete with 2 sets of blades and 1 cutting board.

Other sizes of Sample Cutter are available on request.
