

## EB 02.01P

### Sealed container for testing of Stress Relaxation in liquids

This air tight container can be used up to a pressure of 3 Bar together with the Stress Relaxation Rig, EB 02.

This makes it possible to test samples in coolants under pressure. When testing in volatile fuels evaporation can be eliminated, which reduces explosion and environmental risks.

The container is equipped with a safety valve set to about 3 Bar.

#### Technical data:

Diameter, mm	90
Height, mm	96 + 32
Weight, kg	1,12
Material	Stainless steel
Seals	Fluor rubber

#### Spare part

Set of 6 O-rings, EB02.01P.01
