

# Elastocon

## Elastocon Resistance Tester, EE 02

**Instrument for determination of Electrical resistance on conductive and antistatic Rubber products according to ISO 2878.**

The instrument consists of a battery driven megaohm-meter which can produce test voltages from 250 VDC to 1 000 VDC together with insulated stainless steel electrodes according to ISO 2878.

One pen with conductive silver paint and 1 l of conductive fluid are also included.

### Spare parts

**EE 02.01** Conductive silver pen

**EE 02.02** Conductive liquid, 1l
